In the first nine years I owned it the only things I had to replace were brakes, lights because they generally last a year and the driver's side window. I believe the weather in Wisconsin has a dramatic influence on how the windows operate. To release the pressure on the window on my convertible, I use a credit card to break the seal from the frozen ice in the winter. Another thing I've learned to do in the winter is leave the window down a little so when the temp changes the window doesn't get iced over. Read more. Read less. Sign Up. Heated seats are a real plus in the winter time. Pros: Its a convertible, and its power not manual, heated seats, sport Transmission, Highway gas mileage rocks 24 MPG. I like the fact that it is good on gas and is very stylish. I like how smooth of a ride it is too, you would think since it's so small that it would be a bumpy ride. It has a lot of features that no other car would ever have. Nice comfort. Pros: Fun fun fun! Rare color, nice cream leather interior with heated front seats, fun to drive. Cons: Small Trunk and back seats not very accommodating for larger adults. Oh Baby!!! I've driven on ice and seen SUVs struggle and I had no problems maintaining control. Had several back and forth emails with him as I did not have a phone at the time. For me, the problem is, he's selling the trucks I like so freakin fast, I don't have a chance to get to him soon enough as I am out of state. I'm still looking, so maybe in the near future I'll get there. Overall good contacts,

I owned two beetle tdi and model. I always bought them used and over miles on meters. They drive smoothly but the interiors are horrible. The door panels are never good. I have look at least twenty beetles from craigslist posts and the plastic or leather parts are bad. Their sale price is way lower compared to Japanese. Since I drive mile every day in commuting and i really care about the gas millage. If VW try to earn the market, they should know how to improve this. By the way, the parts are not cheap in this car. It's so much bigger and more comfortable than it looks like it would be— my sister says it's nicer to ride in than my BMW 3 convertible was! I'm buying 10 gallons of gas every days and commuting 50 miles a day, averaging between 38 and 42 mpg lower when the AC is on. I know the VWs have some maintenance issues, but I've had no problems so far. It's a really enjoyable car to drive. This car is incredibly well built and solid considering its' compact size. Its interior features are on the high end, making the modern day

drive quite easy. The gas mileage on the TDI is over two-and-a-half times improved over my guzzling trucks of yore. If you live in cold climates, I'd recommend the cold weather package as heated seats make

 a world of difference. I purchased this car used for the diesel engine as I was commuting mile per week in my job. The car handled very well in all kinds of weather like snow and ice. Mileage was right at 40 mpg on the highway. The TDI engine coupled with the Automatic 6- speed gearbox is like new at miles. I have owned many newe cars in my lifetime and was a Honda owner before this but Volkswagon TDI performance along with durability and realibality really impressed me. I love this car however the trunk lock does not work. The power windows go up and down as they please and the interior clock runs fast, about 5 minutes per month. Other than that a great gas car.
