Gmc acadia starter

GMC Acadia owners have reported 6 problems related to starter under the electrical system category. The most recently reported issues are listed below. Also please check out the statistics and reliability analysis of GMC Acadia based on all problems reported for the Acadia. They then stated theyfound water intrusion on passage side fuse block that shorted out the ecm and bcm. At dealer they replaced fuse block, ecm and bcm. Two weeks later my car battery died so I replaced dead battery with a new one. My thing is this if all these are issues that people all over are complaining about I truly think all these issues should be addressed and fixed a. Before someone gets hurt or killed. See all problems of the GMC Acadia. Truck wont crank! Boosted it off cranked straight up, parked for a hour, wouldn't crank again. Vehicle was stationary in a parking lot. During times of heavy rain or when driving through a car wash, water enters vehicle interior. Water can be heard moving around in headliner of rear while vehicle being driven. With vehicle in motion water can be seen leaking out of air bag label on driver side panel between windshield and door. Inspected drain tubes from sunroof and found them to be completely clogged. Upon clearing debris clogging the tubes an exessive amount of water came shooting out and tubes drained for about an hour a non stop stream. Approximately a week or so later, started having problems starting vehicle. Tested battery and it was fine. Tested alternator and starter, both fine. Two weeks later car wouldn't start again. Upon aaa arriving to jump my vehicle we discovered the entire battery compartment behind passenger seat was completely filled and battery submerged in water. Further inspection found entire floor board saturated and headliner. Mold was also found on seats, seat belts, carpet, air vents, sun visors, and door panels. Have hade it in shop several time but has not been fixed. They keep saying it somethings else ever time. Removed remote started didn't help. Took radio fuse out didn't help. Car will not start when it sits for a day or two something is draining the battery when it sits. An the dealer always say its somethings else its somethings. I'm tired of dealing with these people about my GMC Acadia. The dvds player went out warranty won't cover it radio won't turn off warranty won't cover it warranty didn't cover removing the remote starter. Will not buy another GMC at all. Would like to know where I can sue the company an GMC warranty place. If anyone can help me please let me know who to contact to sue the company. Ms skeens. When she opened the door she found the vehicle trying to start by itself. We do not have a remote starter installed. She removed the keys and took them back into the house. If the vehicle had started during the night while we were sleeping I may not have been able to send you this message. Later when I returned home I called the dealership where we purchased the Acadia and reported the incident to their service specialist. They had not heard of this problem before. My complaint concerns my Acadia delivered sept. Currently with less than 5, miles on it. It is now in the shop for failure to start for the third time. The battery is somehow being dischanged. Other than replacing the original battery, on the first occurance, the dealer service can not seem to track down the source of the problem. They say that the charging system checks out ok. It does seem to start fine for a while, several weeks, then all of a sudden it will have a dead battery over night. Nothing is ever left on. I check that each time the garage door is closed. The headlights always go out in one minute, if on. I am concerned about a possible fire danger and being stranded somwhere. My trouble shooting thoughts point to a starter shorting. I could be wrong but I would start there and prove that not to be the problem. Easiest fix first, the air force way. Car Problems. Starter problem of the GMC Acadia 1. Electrical System problems. Wiring problems. Battery Dead problems. Horn Assembly problems. Car Will Not Start problems. Ignition Switch problems. Car Will Not Accelerate problems. Ignition problems. There are many different issues that can cause the problem. This article is written with the assumption that you are looking for a way to get your GMC Acadia started now, and is meant to provide you with practical advice to help aid in the diagnosis. There are really two main ways that a vehicle will not start. Just use the jump list below to move to your particular situation. But, there are less things to troubleshoot than if it were cranking but will not start. Here are some of the most common issues that cause a vehicle to not crank:. While the battery cables are not necessarily the most likely issue to cause your Acadia to not start, they are some of the easiest to diagnose. You can take a look at the battery poles where the cables connect. If there appears to be green or white corrosion all around it, cleaning them may help get you back on the road. If your battery no longer has enough charge to turn the starter, your Acadia will not start. You can take your battery up to the local parts store, or even Wal-Mart, and have it tested to see if it is still holding a charge. A bad alternator can cause your battery to lose enough charge to start your Acadia. When a starter goes bad, they will usually not give you much warning first. Also, if you are stuck somewhere and are trying to start your Acadia, the old beat the starter with a hammer trick is not a wives tale. It really can get that one last start out of it. There are a lot of issues that

can cause your Acadia to crank, but not start. The engine needs air, fuel, and a spark in order to run. It is highly likely that if the engine is cranking, but not starting that it has thrown an OBDII code. It is definitely worth it to use an OBDII scanner to check and see if the engine has thrown any trouble codes. These codes will tell you what the computer is saying is wrong with your engine. By looking them up on this site, or just Googling them in general will lead you to a detailed diagnosis of that code. Without the proper amount of fuel getting into the combustion chamber, the Acadia will crank, but not start. One of the biggest issues that causes a vehicle to crank but not start is ignition issues. When there is no spark, the engine will not start. Ignition issues can be caused by many things, including bad spark plugs , bad coil packs, bad plug wires, computer issues, and more. The crankshaft sensor can go bad as well. When these sensors go bad, it can be impossible for your Acadia to start. Most modern vehicles come with smart keys that have electronic protection built in. This makes it more challenging for thieves to steal them. There are occasions where this security system will cause the Acadia to not start. There are a lot of issues that can cause your Acadia to not start. There are many reasons that your Acadia may not start. Tracking them down can be downright challenging. With enough time and patience, you can diagnose exactly what is wrong. Good luck with the diagnosis. If there is anything that you would like to add, please leave a comment below. Thank you. Battery Cables While the battery cables are not necessarily the most likely issue to cause your Acadia to not start, they are some of the easiest to diagnose. Battery Charge If your battery no longer has enough charge to turn the starter, your Acadia will not start. Otherwise, it may be the starter that you need to look at. Ignition Issues One of the biggest issues that causes a vehicle to crank but not start is ignition issues. Security Most modern vehicles come with smart keys that have electronic protection built in. Other Issues There are a lot of issues that can cause your Acadia to not start. Tried to start car, no response from starter, lots of messages scrolled on information display about ABS, Reduced power, Steering, Parking brake, etc, etc. Radio, lights, OnStar, climate blower did work. Tried to start for many minutes with no success, so called On Star and arranged for a tow to dealer. While waiting for tow we tried to open rear tailgate to unload car and found it to be inoperative. After waiting an hour for tow, went and tried to start car, and it started with "check engine" light displaying. Took to dealer and he found no definitive cause for problem except a "communication" issue in the computer system. Vehicle is a dealer now for further investigation. Took a short four day vacation in the Smokey Mountains, on the day we were coming home the darn car would not start again. Called Roadside assistance, Thank goodness the provider was quick, but we knew we had a seven hour drive, The electrical system was goofy, screens flashing, making funny sounds But we made it home.. Took it to the dealership, their response was we needed an appointment. I drove the car yesterday no issues. When to leave this morning, going to physical therapy an guess what the darn car would not start! Called Roadside Assistance but had to wait three hour for a tow truck. They had to try three times in order to jump it So now its on its way to the dealer. Stopped for gas, after filling up, the car wouldn't start, all dash icons extinguished, starter didn't make a sound. Called on-star and waited for tow truck, after 30 minutes tow truck hadn't arrived so I tried starting it again, and it started. Third time in less than a month. Took the car to the dealer the next day, check engine light was on. I mean nothing- on the screen it said make sure the key is in the remote- why would u take it out??.. Update from Sep 8, : in aug posted car would not start- didnt happen again If you have a for-profit service, contact us. Ask your GMC dealer. ve Resources. Electricity then flows from the battery, through the starter relay, and to the starter solenoid. Bad Starter Solenoid Symptoms Although you may have heard of a starter solenoid, you might not know what the part actually does. Basically, the starter solenoid is an electromechanical device that engages the starter motor. Most starter solenoids are mounted directly on top of the starter. The Starting System Because batteries emit hydrogen gas while charging, the battery case cannot be completely sealed. Years ago there was a vent cap for each cell and we had to replenish the cells when the electrolyte evaporated. If your engine cranks normally but does not start, the starter motor is not to blame. Automotive professionals break down no-start situations into two separate categories: crank-no-start and no-crank-no-start. Contact Us. Phone Number Shop with Confidence. All Rights Reserved.
