Think neighbor

The Ford TH! NK was a line of electric vehicles produced by the TH! The short-lived line included four models: the TH! NK Neighbor and the TH! NK City, small electric automobiles , and the TH! NK Bike Fun, electric-powered motorized bicycle. Ford sold its stock, and the resulting company, Think Global , produced electric cars in Norway until declaring bankruptcy in The model was 9. Design and manufacture was unrelated to the TH! The Neighbor was initially offered in two models, a two-seater and a four-seater, with a two-passenger utility truck version offered near the end of production. The TH! NK Neighbor had a fixed roof over an open enclosure; a rain cover was optionally available to protect the passengers from the elements. Many options were designed for use on the golf course: it featured a bag rack, a holder for scorecards, tees, and balls, and a club washer. Additionally, there was a trunk option for the four-passenger version that could double as a cooler. A major controversy erupted when Ford decided to crush off-lease TH! NK City cars stockpiled in the U. After protesting by environmentalist groups, including a Greenpeace rally on the roof of Ford's Norway offices, Ford decided to ship the excess vehicles to Norway. Corrective Summary Dealers have been notified to stop sale of these vehicles until the pushrod has been replaced. Notes Customers can also contact the national highway traffic safety administration's auto safety hotline at dashdot Bulletin Bulletin date Replacement Bulletin item no. On certain electric vehicles, the brake master cylinder pushrod, which connects the brake pedal to the master cylinder, could fracture. Fracture of the pushrod would result in the loss of the service brakes. Dealers have been notified to stop sale of these vehicles until the pushrod has been replaced. Customers can also contact the national highway traffic safety administration's auto safety hotline at dashdot Electrical leak to the frame from the battery pack, which may affect diagnosis of electrical components. Think neighbor vehicles may exhibit illumination of the leakage icon, failure to power up, intermittent loss of power, gauge malfunction, and other related vehicle system malfunctions. The main display cluster on the vehicle sizzled and popped upon turning the vehicle on, melting some plastic along with it. I just purchased a ford think electric vehicle. NK neighbor is a battery powered vehicle, capable of speeds up to 25 miles per hour, designed for commuting within closed communities, resorts or work environments. Street legal cart is capable of speeds up to 35 miles per hour. The TH! NK neighbor also gives customers the flexibility to personalize their vehicle with choices from a list of options. NK neighbor is the perfect choice for customers who need mobility within a relatively small, closed geographic area, like a gated community or commercial complex," said Rob Stevens, president of TH! NK neighbor provides the added bonus of being an environmentally friendly zero emissions vehicle," he added. NK neighbor is constructed of an extruded aluminum space frame with thermoplastic body panels. The panels are modular and easily molded into a variety of colors. The interior is weather resistant and designed for ergonomic simplicity, function and on-board stowage. NK neighbor is powered by six lead acid batteries 72 volts total power driving a watt DC motor with 65 ft-lb peak torque RPM. Range is approximately 20 miles, with recharging requiring hours from a standard volt system. Regenerative braking provides onboard charging to the batteries during stop-and-go driving. NK neighbor will come equipped with a two speed selector for private road and golf course applications. The "high" speed setting will be limited to 25 mph. The "low" speed setting will be limited to 15 mph. NK neighbor will meet the new U. Customers can order TH! Call Us! Ford TH! NK neighbor is powered by six lead acid batteries 72 volts total power driving a watt DC motor with 65 ft-lb peak torque RPM Powered by 6 lead acid batteries Range is approximately 20 miles, with recharging requiring hours from a standard volt system. With a number of safety features TH! Gross Vehicle Weight: 2 Passenger lb. Yes people stop me to ask questions. This Think is classified as a Neighborhood Electric Vehicle, which meets the Federal government requirements for low speed vehicles. This combines the benefits of economical electric transportation, no emissions and a safe comfortable ride. These vehicles

are available in only 11 states, and Texas has only 4 dealers. Why the Ford Think? The Mule is similar size, weight and performance, but had room for only 2 passengers and is gasoline powered. Frequently asked questions:. This Think is licensed and inspected in Texas street legal Range, 30 miles on one battery charge Top Speed limited to 25 miles per hour by law Recharge the batteries overnight at any volt outlet, for less than 50 cents. Unlike a golf cart, the Think is street legal: yes you can use this as a golf cart, in Turf mode the top speed is 15mph, What do I use this for? No freeway driving. Specifications for the 4-passenger model:. Optional accessories on this car this is the basic model. Maintenance free batteries, you never have to add water. Wide turf tires they look better than the narrow tires. First Impressions. Big windshield, large open space, bright colors. That night I was able to drive both the 2 passengers and 4-passenger model several times. The Think was easy to get in and out, with the grab handle in the right place. The three position seat belts hold you in the care securely. I had a positive first impression from my test drives that night. Thanks to the EAA guys for letting me take many test drives. Here is the website for the Houston Electric Auto Association, Also here is a picture of the Think and the Cyclops, do you agree they look alike? I went home and did my research, and subsequently purchased this car and took delivery on July 19, You can also check inventory, availability and prices at McRee at this website: See: This is a first time for me to use an electronic shop manual, and I like it. I drove around the neighborhood for about six to eight miles, until it got dark. Here is what we noticed, we were able to see and visit our neighbors. We would stop several times to visit with our neighbors, many we have not seen for a year. The cornering ability of the Think is unbelievable. The independent suspension gives the ability to corner faster than I thought possible. The low center of gravity and weight of the batteries contribute to this stability. I made the right choice to buy the four passenger model Think, because everyone wants to go for a test drive or catch a ride to the store with you. This is a great chance to make new friends. Is it a golf cart? On Monday morning, I contacted my insurance agent to add the Think to my auto policy, and the agent had difficulty understanding what a Think was. Finally I emailed her a copy of the purchase invoice, which showed the VIN vehicle identification number and a picture of the Think. Two days later I received an insurance card to show coverage for the Think. The over 50 year old, men are the ones who notice and have interest in the Think and stop me to ask questions. This tax credit is available for individuals, on their income tax return. Not confuse this tax credit with a tax deduction.
